Beverage Booker

Use-Case: Fill Cart

1. Brief Description

When a customer
Wants to make purchases from the cafe they fill their cart
So that they can later buy these items using the app and checkout process

2. Actors

2.1. Customer
The customer is wanting to order food and/or beverages from the café via the app

3. Pre-Conditions

- 3.1. The customer has already created an account
- 3.2. The customer has opened the app on their Android device
- 3.3. The customer has a stable internet connection
- 3.4. The customer has logged in

4. Normal Flow

The use case begins when the customer clicks the 'Continue' button on the Profile Activity

Actor	System
	1. App moves to Main Menu Activity
2. User clicks the 'Menu' button	3. App moves to Browse Menu Activity
	4. Menu items list and prices are displayed
4. User clicks 'Add to Cart' button next to an item	5. Toast message displayed: "Item added to Cart"

The use case ends.

5. Alternate Flows

5.1. User adds another menu item to their cart

If at step 4 of the normal flow the user clicks 'Add to Cart' button next to another item, then

Actor	System
	4.1. Toast message displayed: "Item added to Cart"

Normal flow is resumed at step 4 OR the use case may end if the user has finished adding items to their cart
