| | | | | |
|--|---|--|----------|----------|
| Test Name | FillCart Database testing - GetCartItems | | | |
| Use Case Tested: | FillCart | | | |
| Test Description: | Test for the retrieval of the FillCart database and its corresponding items, using a user ID. | | | |
| Pre-conditions | An established Database | | | |
| Post-conditions | It either errors displaying some sort of failure or it passes and items are displayed. | | | |
| Notes: | Used postman to retrieve items from the cart database | | | |
| Result (Pass/Fail/Warning/Incomplete) | PASSED on application end, PASSED on Postman end. | | | |
| | TEST STEP | EXPECTED TEST RESULTS | P | F |
| 1. | (Application) Getting the item from the database to display on screen. | The application displays all cart database items | P | |
| 2. | (Postman) Getting the item from the database (Used line "localhost/BeverageApi/public/getcartitems" to send the information). | The postman app provides a list of all cart database items for the userID specified. | P | |

See below for outputs.
