

# **Beverage Booker**

## **Testing Manifest**

### **Please Read:**

Our Testing Manifest provides an overview of what tests were carried out and the outcomes for each test.

For all our automated testing the results were exported in HTML format.

To display results in the clearest format, we have constructed a dedicated website for testing results. While the manifest does document each test, the easiest way to navigate and view test results in more detail is through the website. The website also has the PDF document for each Alpha UAT embedded in the website.

The Postman server tests are especially detailed, and you can click through the results to view things such as what tests passed, the different run iterations, as well as results and data for each individual test.

## UAT: Construction Iteration 1

Scenario	Test Name	Result	Tester
Empty Cart	1.1 Empty Cart - User Adds One Menu Item Then Empties Cart	Passed	All Team Members
	1.2 Empty Cart - User Adds Multiple Menu Items Then Empties Cart	Passed	All Team Members
	1.3 Empty Cart - User Presses 'Empty Cart' Button When Cart Is Already Empty	Passed	All Team Members
Book Delivery	2.1 Book Delivery - User Chooses Delivery During Checkout and Uses Valid Address and Credit Card Data	Passed	All Team Members
	2.2 Book Delivery - User Chooses Delivery During Checkout and Uses Invalid 'Unit/Street Number' Input	Failed	All Team Members
	2.3 Book Delivery - User Chooses Delivery During Checkout and Uses Invalid 'Street Name' Input	Failed	All Team Members
	2.4 Book Delivery - Staff Member Views Delivery and Clicks 'Delivered' Button	Passed	All Team Members
Book Pick Up	3.1 Book Pick Up - User Chooses Pick Up During Checkout and Uses Valid Credit Card Data	Passed	All Team Members

## UAT: Construction Iteration 2

Scenario	Test Name	Result	Tester
Place Order (Stripe Payment)	1.1 Place Order - User Uses Valid Australian Visa Credit Card to Place Pick Up Order	Passed	All Team Members
	1.2 Place Order - User Uses Valid Australian Visa Credit Card to Place Delivery Order	Passed	All Team Members
	1.3 Place Order - User Uses Valid Visa Credit Card That Requires Authentication and Completes Authentication	Passed	All Team Members
	1.4 Place Order - User Uses Valid Visa Credit Card That Requires Authentication and Fails Authentication	Passed	All Team Members
	1.5 Place Order - User Uses Credit Card That Has Expired But Enters Valid Expiry Date	Passed	All Team Members
	1.6 Place Order - User Uses Credit Card With Incorrect CVC Number	Passed	All Team Members
	1.7 Place Order - User Enters Post Code That Does Not Match Credit Card Billing Address	Passed	All Team Members
	1.8 Place Order - User Enters Valid Credit Card But is Declined for Insufficient Funds	Passed	All Team Members
Usability	2.1 Usability - User Clicks the Sign Out Button on the Profile Activity Page	Passed	All Team Members

	2.2 Usability - User Clicks the Sign Out Button on the Menu Bar	Passed	All Team Members
	2.3 Usability - User Clicks the Account Button on the Menu Bar	Passed	All Team Members
	2.4 Usability - User Clicks the Cart Button on the Menu Bar	Passed	All Team Members
	2.5 Usability - User Clicks the Home Button on the Menu Bar	Passed	All Team Members
Manage Menu	3.1 Manage Menu - User Browses the Menu	Passed	All Team Members
	3.2 Manage Menu - User Clicks Delete Menu Item But Cancels at Confirmation	Passed	All Team Members
	3.3 Manage Menu - User Deletes Menu Item	Passed	All Team Members

## UAT: Construction Iteration 3

Collection	Test Name	Result	Tester
Fill Cart/Place Order (Menu Options)	1.1 Fill Cart/Place Order (Menu Options) - User Adds Flat White to Cart	Passed	All Team Members
	1.2 Fill Cart/Place Order (Menu Options) - User Adds Second Identical Flat White to Cart	Passed	All Team Members
	1.3 Fill Cart/Place Order (Menu Options) - User Adds Sausage Roll to Cart	Passed	All Team Members
	1.4 Fill Cart/Place Order (Menu Options) - User Places Pick Up Order	Passed	All Team Members
	1.5 Fill Cart/Place Order (Menu Options) - User Adds Blueberry Muffin to Cart	Passed	All Team Members
	1.6 Fill Cart/Place Order (Menu Options) - User Adds Frappe to Cart	Passed	All Team Members
	1.7 Fill Cart/Place Order (Menu Options) - User Places Delivery Order With Valid Address	Passed	All Team Members
Fill Order (Queueing System)	2.1 Fill Order (Queueing System) - Two Staff Members Log In And One Starts an Order	Passed	All Team Members

	2.2 Fill Order (Queueing System) - Staff Member Backs Out of Filling Order and Then Second Staff Member Continues the Order	Passed	All Team Members
--	---	--------	------------------

## UAT: Construction Iteration 4

Scenario	Test Name	Result	Tester
Fill Cart/Empty Cart (Inventory)	1.1 Fill Cart/Empty Cart (Inventory) - User Adds a Food Item to Cart	Passed	All Team Members
	1.2 Fill Cart/Empty Cart (Inventory) - User Adds a Drink Item to Cart	Passed	All Team Members
	1.3 Fill Cart/Empty Cart (Inventory) - User Tries to Add Sold Out Food Item to Cart	Passed	All Team Members
	1.4 Fill Cart/Empty Cart (Inventory) - User Deletes a Single Food Item From Cart	Passed	All Team Members
	1.5 Fill Cart/Empty Cart (Inventory) - User Deletes a Single Drink Item From Cart	Passed	All Team Members
	1.6 Fill Cart/Empty Cart (Inventory) - User Empties Entire Cart	Passed	All Team Members
Fill Cart/Place Order (Drink Size Options)	2.1 Fill Cart/Place Order (Drink Size Options) - User Adds a Drink Item to Cart and Places Pick Up Order	Passed	All Team Members
	2.2 Fill Cart/Place Order (Drink Size Options) - User Adds a Drink Item to Cart and Places Delivery Order	Passed	All Team Members
Fill Order (Order Completion + Push Notification)	3.1 Fill Order (Order Completion + Push Notification) - User Fills Order and Presses Complete Order Button	Passed	All Team Members

## UAT: Construction Iteration 5

Scenario	Test Name	Result	Tester
Book Delivery	1.1 Book Delivery - User Tries to Book Delivery With Both Input Fields Empty	Passed	All Team Members
	1.2 Book Delivery - User Tries to Enter Symbols Into Street Address Input Field	Passed	All Team Members
	1.3 Book Delivery - User Books Delivery With Unit Field Empty	Failed	All Team Members
	1.4 Book Delivery - User Books Delivery With Unit Number	Failed	All Team Members
View Account	2.1 View Account - User Tries to Update Account Details With Empty First Name Field	Passed	All Team Members
	2.2 View Account - User Updates Account Details With Valid First Name	Passed	All Team Members
	2.3 View Account - User Tries to Update Account Details With Empty Last Name Field	Passed	All Team Members
	2.4 View Account - User Updates Account Details With Valid Last Name	Passed	All Team Members
	2.5 View Account - User Tries to Update Account Details With Empty Email Field	Passed	All Team Members

	2.6 View Account - User Tries to Update Account Details With Invalid Email Address Format	Passed	All Team Members
	2.7 View Account - User Updates Account Details With Valid Email Address	Passed	All Team Members
	2.8 View Account - User Tries to Update Account Details With Empty Phone Field	Passed	All Team Members
	2.9 View Account - User Tries to Update Account Details With Phone Number That is Not 10 Digits	Passed	All Team Members
	2.9.1 View Account - User Updates Account Details With Valid Phone Number	Passed	All Team Members
	2.9.2 View Account - User Tries to Update Password With First Password Field Empty	Passed	All Team Members
	2.9.3 View Account - User Tries to Update Password With Second Password Field Empty	Passed	All Team Members
	2.9.4 View Account - User Tries to Update Password With First and Second Password Fields That Do Not Match	Passed	All Team Members
	2.9.5 View Account - User Updates Account Password With Valid Password	Passed	All Team Members
	2.9.6 View Account - User Clicks Delete Account But Cancels at Confirmation	Passed	All Team Members

	2.9.7 View Account - User Deletes Account	Passed	All Team Members
Manage Menu	3.1 Manage Menu - User Tries to Add a Menu Item With the Title Field Empty	Passed	All Team Members
	3.2 Manage Menu - User Tries to Add a Menu Item With the Item Price Field Empty	Passed	All Team Members
	3.3 Manage Menu - User Tries to Add a Menu Item With the Preparation Time Field Empty	Passed	All Team Members
	3.4 Manage Menu - User Tries to Add a Menu Item With Title That Already Exists	Passed	All Team Members
	3.5 Manage Menu - User Adds Food Menu Item With Valid Data	Passed	All Team Members
	3.6 Manage Menu - User Adds Drink Menu Item With Valid Data	Passed	All Team Members
	3.7 Manage Menu - User Tries to Edit a Menu Item With Title That Already Exists	Passed	All Team Members
	3.8 Manage Menu - User Edits a Food Menu Item	Passed	All Team Members
	3.9 Manage Menu - User Edits a Drink Menu Item	Passed	All Team Members
	3.9.1 Manage Menu - User Deletes Food Menu Item	Passed	All Team

			Members
	3.9.2 Manage Menu - User Deletes Drink Menu Item	<b>Passed</b>	All Team Members
Update Inventory	4.1 Update Inventory - User Updates the Stock Level for a Menu Item	<b>Passed</b>	All Team Members

## UAT: Construction Iteration 6

Collection	Test Name	Result	Tester
Place Order/ Fill Order	1.1 Place Order/Fill Order - User Books a Pick Up Order Containing Drink Items	Passed	All Team Members
	1.2 Place Order/Fill Order - User Books a Pick Up Order Containing Food Items	Passed	All Team Members
	1.3 Place Order/Fill Order - User Books a Pick Up Order Containing Mixed Items	Passed	All Team Members
	1.4 Place Order/Fill Order - User Books a Delivery Order Containing Drink Items	Passed	All Team Members
	1.5 Place Order/Fill Order - User Books a Delivery Order Containing Food Items	Passed	All Team Members
	1.6 Place Order/Fill Order - User Books a Delivery Order Containing Mixed Items	Passed	All Team Members
	1.7 Place Order/Fill Order - User Books a Delivery Order With Valid Street Address (No Unit Number)	Passed	All Team Members
	1.8 Place Order/Fill Order - User Books a Delivery Order With Valid Unit Number Address	Passed	All Team Members
Help Menu	2.1 Help Menu - User Clicks Help Text on the Create User Screen	Passed	All Team Members

	2.2 Help Menu - User Clicks Help Text on the Login Screen	Passed	All Team Members
	2.3 Help Menu - User Clicks Help Text on the Add to Cart Screen	Passed	All Team Members
	2.4 Help Menu - User Clicks Help Text on the Book Delivery Screen	Passed	All Team Members
	2.5 Help Menu - User Clicks Help Text on the Place Order Screen	Passed	All Team Members
	2.6 Help Menu - User Clicks Help Text on the Account Screen	Passed	All Team Members
	2.7 Help Menu - User Clicks Create User Help Menu Button	Passed	All Team Members
	2.8 Help Menu - User Clicks Login Help Menu Button	Passed	All Team Members
	2.9 Help Menu - User Clicks Fill Cart Help Menu Button	Passed	All Team Members
	2.9.1 Help Menu - User Clicks Empty Cart Help Menu Button	Passed	All Team Members
	2.9.2 Help Menu - User Clicks Place Order Help Menu Button	Passed	All Team Members
	2.9.3 Help Menu - User Clicks Book Delivery Help Menu Button	Passed	All Team Members

	2.9.4 Help Menu - User Clicks Update User Help Menu Button	<b>Passed</b>	All Team Members
	2.9.5 Help Menu - User Clicks Delete User Help Menu Button	<b>Passed</b>	All Team Members
Privacy Policy	3.1 Privacy Policy - User Clicks the Privacy Policy on the Create User Page	<b>Passed</b>	Benn Curby

**Deployment: Customer App**

Collection	Use-Case	Result	Tester
Android	Create User	Passed	Benn Curby

### a\_IsCreatUserFieldsDisplayed

**Description:**

This test within the Android instrumented test collection tests whether all the fields are displayed correctly on the Create User page of the Customer App.

**Post-conditions:**

All the fields are displayed correctly.

**Result:** Passed

### b\_IsUserCreatedWithEmailEmpty

**Description:**

This test within the Android instrumented test collection tests whether a user is created when the email field is empty.

**Post-conditions:**

The new user is not created and an error message is displayed over the empty email field.

**Data required:**

**Email:** <empty>

**Password:** 123456

**First Name:** Jane

**Last Name:** Doe

**Phone:** 0402555444

**Result:** Passed

### c\_IsUserCreatedWithPasswordEmpty

**Description:**

This test within the Android instrumented test collection tests whether a user is created when the password field is empty.

**Post-conditions:**

The new user is not created and an error message is displayed over the empty password field.

**Data required:**

Email: janedoe@gmail.com

Password: <empty>

First Name: Jane

Last Name: Doe

Phone: 0402555444

**Result:** Passed

### d\_IsUserCreatedWithFirstNameEmpty

**Description:**

This test within the Android instrumented test collection tests whether a user is created when the first name field is empty.

**Post-conditions:**

The new user is not created and an error message is displayed over the empty first name field.

**Data required:**

Email: janedoe@gmail.com

Password: 123456

First Name: <empty>

Last Name: Doe

Phone: 0402555444

**Result:** Passed

### e\_IsUserCreatedWithLastNameEmpty

**Description:**

This test within the Android instrumented test collection tests whether a user is created when the last name field is empty.

**Post-conditions:**

The new user is not created and an error message is displayed over the empty last name field.

**Data required:**

Email: janedoe@gmail.com

Password: 123456

First Name: Jane

Last Name: <empty>

Phone: 0402555444

**Result:** Passed

### f\_IsUserCreatedWithPhoneEmpty

**Description:**

This test within the Android instrumented test collection tests whether a user is created when the phone field is empty.

**Post-conditions:**

The new user is not created and an error message is displayed over the empty phone field.

**Data required:**

Email: janedoe@gmail.com

Password: 123456

First Name: Jane

Last Name: Doe

Phone: <empty>

**Result:** Passed

### g\_IsUserCreatedWithEmailIncorrectFormat

**Description:**

This test within the Android instrumented test collection tests whether a user is created when the email is the incorrect format.

**Post-conditions:**

The new user is not created and an error message is displayed over the incorrectly formatted email field.

**Data required:**

Email: **janedoe.com**

Password: 123456

First Name: Jane

Last Name: Doe

Phone: 0402555444

**Result:** **Passed**

### h\_IsUserCreatedWithPasswordNotRequiredLength

**Description:**

This test within the Android instrumented test collection tests whether a user is created when the password is not the required length (minimum 6 characters).

**Post-conditions:**

The new user is not created and an error message is displayed over the password field.

**Data required:**

Email: janedoe@gmail.com

Password: **12345**

First Name: Jane

Last Name: Doe

Phone: 0402555444

**Result:** **Passed**

### i\_IsUserCreatedWithValidData

**Description:**

This test within the Android instrumented test collection tests whether a user is created with valid data in all fields.

**Post-conditions:**

The new user is created.

**Data required:**

**Email:** janedoe@gmail.com

**Password:** 123456

**First Name:** Jane

**Last Name:** Doe

**Phone:** 0402555444

**Result:** **Passed**

### Use-Case: Create User

#### Create User - Web Server Postman Tests

**Tester:** Benn Curby

**Description:**

This Postman test collection tests normal and alternate flows for a user trying to create an account on the Beverage Booker web server.

**Pre-conditions:**

1. The user cannot already exist in the database.
2. The connection to the server is stable.

**Results:**

Results and test data are exported from these tests in HTML and can be found at our dedicated test results website.

### a\_IsLoginFieldsDisplayed

**Description:**

This test within the Android instrumented test collection tests whether all the fields are displayed correctly on the Login page of the Customer App.

**Post-conditions:**

All the fields are displayed correctly.

**Result:** Passed

### b\_IsUserLoggedInWithEmptyEmail

**Description:**

This test within the Android instrumented test collection tests whether a user is logged in when the email field is empty.

**Post-conditions:**

The user is not logged in and an error message is displayed over the empty email field.

**Data required:**

**Email:** <empty>

**Password:** 123456

**Result:** Passed

### c\_IsUserLoggedInWithEmptyPassword

**Description:**

This test within the Android instrumented test collection tests whether a user is logged in when the password field is empty.

**Post-conditions:**

The user is not logged in and an error message is displayed over the empty password field.

**Data required:**

Email: janedoe@gmail.com

Password: <empty>

**Result:** Passed

### d\_IsUserLoggedInWithInvalidEmailFormat

**Description:**

This test within the Android instrumented test collection tests whether a user is logged in when the email entered is incorrectly formatted.

**Post-conditions:**

The user is not logged in and an error message is displayed over the email field.

**Data required:**

Email: janedoe.com

Password: 123456

**Result:** Passed

### e\_IsUserLoggedInWithValidData

**Description:**

This test within the Android instrumented test collection tests whether a user is logged in with valid account data.

**Post-conditions:**

The user is logged into the Customer App.

**Data required:**

**Email:** janedoe@gmail.com

**Password:** 123456

**Result:** **Passed**

### Use-Case: Login

#### Log In - Web Server Postman Tests

**Tester:** Benn Curby

**Description:**

This Postman test collection tests normal and alternate flows for a user trying to login on the Beverage Booker web server.

**Pre-conditions:**

1. The user already exists in the database.
2. The user is not already logged in.
3. The connection to the server is stable.

**Results:**

Results and test data are exported from these tests in HTML and can be found at our dedicated test results website.

[Beverage Booker Test Results Website - Log In](#)

## Use-Case: Sign Out

### Test Collection - InstrumentedTestForSignOut

**Tester:** Jake Durnford

**Description:**

This Android instrumented test collection tests normal and alternate flows for a registered user trying to sign out of an existing account on the Customer App.

**Pre-conditions:**

1. The user already exists in the database.
2. The user is already logged in.
3. The connection to the server is stable.

**Results:**

### signOutOfMenuBar

**Description:**

This test within the Android instrumented test collection tests whether the sign out button is displayed correctly and also signs a user out using the menu bar of the Customer App.

**Post-conditions:**

The Sign Out button is displayed and the user signs out of the Customer App.

**Data required:**

**Email:** janedoe@gmail.com

**Password:** 123456

**Result:** Passed

### signOutOfProfileActivity

**Description:**

This test within the Android instrumented test collection tests whether a user can sign out of the profile activity page.

**Post-conditions:**

The user is logged out successfully using the Profile Activity page.

**Data required:**

**Email:** janedoe@gmail.com

**Password:** 123456

**Result:** Passed

## Test Collection - InstrumentedTestForSignOut (Updated)

**Tester:** Benn Curby

**Description:**

This updated Android instrumented test collection tests normal and alternate flows for a registered user trying to sign out of an existing account on the Customer App.

**Pre-conditions:**

1. The user already exists in the database.
2. The user is already logged in.

This test within the Android instrumented test collection tests whether an item can be emptied from the user cart in the Customer App.

**Post-conditions:**

The cart is empty.

**Data required:**

**Result:** Passed

## Use-Case: Empty Cart

### Test Collection - InstrumentedEmptyCartTest (Inventory Update)

**Tester:** Benn Curby

**Description:**

This Android instrumented test collection tests normal flows for a user trying to empty their cart on the Customer App.

**Pre-conditions:**

1. The user cannot already exist in the database.
2. The connection to the server is stable.

**Results:** 01/09/20

### isFillCartDeleteSingleCartItemSuccessful

**Description:**

This Android integration test collection tests normal and alternate flows for a user trying to add an item to cart and then delete the item from their cart on the Customer App.

**Post-conditions:**

The item is no longer in the user cart.

**Result:** Passed

### Use-Case: Empty Cart

#### Empty Cart - Local Server Postman Tests

**Tester:** Benn Curby

**Description:**

This Postman test collection tests normal and alternate flows for a user trying to empty their cart on the local server.

**Pre-conditions:**

1. The user already exists in the database.
2. The user is logged in.
3. The connection to the server is stable.
4. There is an item in the user cart.

**Results:**

Results and test data are exported from these tests in HTML and can be found at our dedicated test results website.

### BookDeliveryA\_SelectDelivery

**Description:**

This test within the Android instrumented test collection tests whether a registered user can select delivery for an order in the Customer App.

**Post-conditions:**

User successfully selects 'delivery' and is taken to the address input page

**Result:** Passed

### BookDeliveryB\_SelectPickUp

**Description:**

This test within the Android instrumented test collection tests whether a registered user can select pick up for an order in the Customer App.

**Post-conditions:**

User successfully selects 'Pick Up' and is taken to the payment input page

**Result:** Passed

### BookDeliveryC\_FillOutInformation\_ErrorAtNumber

**Description:**

This test within the Android instrumented test collection tests whether a registered user can book a delivery if there is an error at the street number input field on the address input page of the Customer App.

**Post-conditions:**

Error message is displayed over the number input field.

**Result:** Passed

### BookDeliveryD\_FillOutInformation\_ErrorAtName

**Description:**

This test within the Android instrumented test collection tests whether a registered user can book a delivery if there is an error at the street name input field on the address input page of the Customer App.

**Post-conditions:**

Error message is displayed over the street name input field.

**Result:** Passed

### a\_IsFieldsForDeliveryInputDisplayed

**Description:**

This test within the Android instrumented test collection tests whether the delivery fields are displaying correctly on the address input page of the Customer App.

**Post-conditions:**

All address fields are displayed.

**Result:** Passed

### b\_IsEmptyUnitNumberAccepted

**Description:**

This test within the Android instrumented test collection tests whether an empty unit number field input is accepted when entering an address.

**Post-conditions:**

Delivery address without unit number is accepted.

**Data required:**

**Unit Number:** <empty>

**Street Address:** 17 Smith St

**Result:** Passed

## c\_IsValidUnitNumberAndStreetNameAccepted

**Description:**

This test within the Android instrumented test collection tests whether an address with a valid unit number and street address is accepted when entering an address on the address input page.

**Post-conditions:**

Delivery address with unit number is accepted.

**Data required:**

Unit Number: 1

Street Address: 17 Smith St

**Result:** Passed

## d\_IsInvalidSymbolsStreetNameAccepted

**Description:**

This test within the Android instrumented test collection tests whether symbols are accepted in the street address input field on the address input page.

**Post-conditions:**

Error message is displayed over the street address input field.

**Data required:**

Unit Number: 1

Street Address: ?!#\$

**Result:** Passed

### e\_IsEmptyStreetNameAccepted

**Description:**

This test within the Android instrumented test collection tests whether an empty street name field input is accepted when entering an address.

**Post-conditions:**

Error message is displayed over the street address input field.

**Data required:**

Unit Number: 1

Street Address: **<empty>**

**Result:** **Passed**

## Test Collection - InstrumentedTestForPlaceOrder

**First Name:** Sergio

**Last Name:** Reguilon

**Phone:** 0402555444

**Result:** **Passed**

## h\_IsPhoneNumberChangedWhenEmpty

**Description:**

This test within the Android instrumented test collection tests whether the phone number of a user can be changed if the field is empty on the Account page of the Customer App.

**Post-conditions:**

An error message is shown over the phone number field.

**Data required:**

**Email:** sergio@gmail.com

**Password:** 123456

**First Name:** Sergio

**Last Name:** Reguilon

**Phone:** <empty>

**Result:** **Passed**

### i\_IsPhoneNumberChangedWhenNotTenDigits

**Description:**

This test within the Android instrumented test collection tests whether the phone number of a user can be changed if the field has invalid data on the Account page of the Customer App.

**Post-conditions:**

An error message is shown over the phone number field.

**Data required:**

**Email:** sergio@gmail.com

**Password:** 123456

**First Name:** Sergio

**Last Name:** Reguilon

**Phone:** 123456789

**Result:** Passed

### j\_IsPhoneNumberChangedSuccessfully

**Description:**

This test within the Android instrumented test collection tests whether the phone number of a user can be changed if the field has valid data on the Account page of the Customer App.

**Post-conditions:**

The phone number is changed successfully.

**Data required:**

**Email:** sergio@gmail.com

**Password:** 123456

**First Name:** Sergio

**Last Name:** Reguilon

**Phone:** 0400230230

**Result:** Passed

### k\_IsPasswordChangedWhenFirstPasswordFieldEmpty

**Description:**

This test within the Android instrumented test collection tests whether the password of a user can be changed if the first password field is empty on the Account page of the Customer App.

**Post-conditions:**

An error message is shown over the first password field.

**Data required:**

First Password: <empty>

First Password: 123456789

**Result:** Passed

### l\_IsPhoneNumberChangedSuccessfully

**Description:**

This test within the Android instrumented test collection tests whether the password of a user can be changed if the second password field is empty on the Account page of the Customer App.

**Post-conditions:**

An error message is shown over the second password field.

**Data required:**

First Password: 123456789

First Password: <empty>

**Result:** Passed

### m\_IsPasswordChangedWhenPasswordFieldsDoNotMatch

**Description:**

This test within the Android instrumented test collection tests whether the password of a user can be changed if the first password field and second password field on the Account page of the Customer App.

**Post-conditions:**

An error message is shown over the first password field.

**Data required:**

First Password: 123456789

First Password: 987654321

**Result:** Passed

### n\_IsPasswordChangedSuccessfully

**Description:**

This test within the Android instrumented test collection tests whether the password of a user can be changed if the first and second password fields match on the Account page of the Customer App.

**Post-conditions:**

Password is changed successfully.

**Data required:**

First Password: 123456789

First Password: 123456789

**Result:** Passed

### o\_IsAccountDeletedSuccessfully

**Description:**

This test within the Android instrumented test collection tests whether the account of a user can be deleted on the Account page of the Customer App.

**Post-conditions:**

Account is deleted successfully.

**Result:** Passed

### Use-Case: View Account

#### View Account - Local Server Postman Tests

**Tester:** Benn Curby

**Description:**

This Postman test collection tests normal and alternate flows for a user trying to update and delete an account on the local server.

**Pre-conditions:**

1. The user already exists in the database.
2. The connection to the server is stable.

**Results:**

Results and test data are exported from these tests in HTML and can be found at our dedicated test results website.

#### Update Inventory (Manager) - Web Server Postman Tests

**Tester:** Benn Curby

**Description:**

This Postman test collection tests the normal and alternate flows for a manager trying to update an inventory item on the Beverage Booker web server.

**Pre-conditions:**

1. The user already exists in the database.
2. The connection to the server is stable.
3. There is a food menu item in the database.

**Results:**

Results and test data are exported from these tests in HTML and can be found at our dedicated test results website.
