

Oversight meeting notes for 25/08/20:

8:07: Excellent reporting.

8:07: Concerning as it was a tough iteration.

8:09: We must be ready to go beta at the end of the milestone, have all documents listed e.g. feedback sheets – “that’s all gotta be done to actually achieve the milestone” says it should be down in C5 contingency.

8:24: He is not happy with how much stuff we have on the iteration plan 4. “there is still some flexibility at the end of semester”, “shouldn’t be planning to use our contingency time”, wants us to consider going into C6.

8:30: Confirms we can take C6 and says it's nothing to do with how we have gone about our development so far. Just the scope is large.

8:53: Recommended we recall if there was anything, we could have done anything different to get the project completed in a timelier matter.
